

DRUM-VAC HEAVY-DUTY INDUSTRIAL VACUUM SYSTEM:

Product of Hi-Vac Corporation

Hi-Vac Corporation is pleased to offer the Drum-Vac line of compact, versatile and economical vacuum systems, which are built with the same heavy duty construction that you have come to expect from a Hi-Vac machine. The Drum-Vac is available with an electric motor or gas engine drive system connected to a positive displacement vacuum producer with vacuum capable of up to 16" Hg.

Models- 10HP, 15HP and 18HP

Stationary -- Bottom Discharge

Portable ---- Integrated 4-wheel dolly, Fork-lift or Trailer Mounted

< Drum Vac-180 18 HP, portable vacuum unit with 18HP gasoline powered engine drive system, with 4-wheeled dolly and bottom discharge system

Drum Vac-180 portable vacuum unit with gas powered engine: Shown with vacuum nozzle accessories, vacuum hose and drum fill topper used to directly fill a 55 gallon drum >

< Drum-Vac-150 15HP, portable gasoline engine drive system with positive displacement vacuum producer of up to 16" Hg with drum fill topper added to directly fill 55 gallon drums

DRUM-VAC BASE MODELS:

Drum-Vac-100 10HP electric motor drive system, direct driven positive displacement vacuum producer of up to 12” Hg. Stationary bottom discharge with 8” hand operated gate, 48” tall detachable support stand legs, pocketed material inlet assembly, GORTEX filtering cartridge with manual reverse air cleaning system

Drum-Vac-150 15HP electric motor drive system, direct driven positive displacement vacuum producer of up to 14” Hg. Stationary bottom discharge with 8” hand operated gate, 48” tall detachable support stand legs, pocketed material inlet assembly, GORTEX filtering cartridge with manual reverse air cleaning system

Drum-Vac-180 18HP electric motor drive system, direct driven positive displacement vacuum producer of up to 16” Hg. Stationary bottom discharge with 8” hand operated gate, 48” tall detachable support stand legs, pocketed material inlet assembly, GORTEX filtering cartridge with manual reverse air cleaning system

EQUIPMENT OPTIONS:

Gasoline Engine Options:

- 10HP -
- 15HP -
- 18HP -

Continued:

Trailer Option:

Two (2) wheeled trailer with tube frame, storage tool box with full top open hinged lid, tail lights, jack stand and hitch assembly

Drum Topper assembly with standard inlet/outlet, gasketed ring, float ball level indicator assembly, preset safety relief valve

Auto Reverse Pulse Cartridge Cleaning Option: Filter cleaning is continuous and is accomplished by a timed pulse of compressed air

HEPA Filter Option: Retains all particles down to 0.3 microns at 99.97% efficiency, thus retaining all harmful allergens

316 Stainless Steel construction of the filter / hopper area of the Drum Vac system. This will aid in reducing potential sparking of conveyed material within our unit.

< **Drum Vac-180** 18 HP, gasoline powered vacuum unit mounted on a 2-wheeled trailer with storage tool box

Standard drum topper assembly has a gasketed ring, float ball level indicator assembly to allow dry and liquid clean up. Drum topper includes inlet and outlet pipes and a relief valve with preset vacuum relief to prevent strong vacuum suction from collapsing collection drum >
